They have even copied the standard of volts and the form of cut-out. The fact that they have not duplicated this plant would seem, however, to indicate that they have found some difficulties in operation in which perhaps they have not succeeded in obtaining the results of the Edison Company s experiments. For the past ten years Charles Heisler, of St. Louis, has been with commendable pertinacity endeavoring to develop some practical notion in electric lighting. While the arc light was still young, he advertised with great flourish of trumpets, that he had succeeded perfectly in subdividing the arc unit of 2,000 c. p. so as to get any power which might be required with substantially no loss in economy. Like many other of the...
