By Thomas Petermann

Books On Demand. Paperback. Book Condition: New. Paperback. 156 pages. Dimensions: 8.3in. x 5.8in. x 0.3in. This book provides comprehensive answers to the key questions of the further development: Which scientific results could cater to the needs of potential gene doping? Where are the future gateways in top-level and popular sports? And how can prohibitions and monitoring be used in responding to this? Another question will be which individual behavioural patterns of athletes and which social contexts will play a role with regard to the potential career of gene doping....
