Pages Number: 231 Publisher: Heilongjiang Science and Technology Press Pub. Date :2007-09-01. Today, the green building technologies and sustainable Practice in the construction industry plays an ever important role. Residential development projects (such as Malaysia, Bukit Ledang Gardens and Singapore s first eco-town community Punggol tree house) is widely used in environmental protection and energy saving measures. Former household PV systems installed on the roof; the latter set roof garden, planting boxes placed at each terrace, and with water-saving features, to achieve a comprehensive green. Vietnam s commercial buildings, such as Asia Commercial Bank REE office building offices and use of the passive design strategies (such as building orientation and spatial distribution, shading and natural ventilation). University of Hong Kong to take a number of years the campus heating and cooling load reduction measures, such as the widely cultivated plants and the use of efficient facades. In addition to building more environmentally friendly, more large-scale construction will also be bolder available. Some of the city s skyline will be completely changed; landmark project will let people work, live, entertainment and travel the way a dramatic change. JAKARTA Rasuna Epicentrum Malaysia s financial plan for its egg-shaped appearance of the building is impressive. Perth stadium design inspiration from the fascinating maze and a heritage building, Sinosteel International Plaza hexagonal windows, makes the building look exactly like the honeycomb structure, hexagonal structure of the windows is also an integral part of the support system. Singapore Marina Bay Sands integrated resort development project costing billions of dollars, not only will change the urban landscape, it will become the new national and regional tourism, entertainment and dining destination. Another landmark of Singapore...
